

British Heart Valve Society

Improving Care for Patients with Heart Valve Disease

State of the Art Management in Heart Valve Disease

This is an exciting opportunity to learn about state of the art practice in the rapidly evolving field of heart valve disease

The aims of this educational day are:

1. To provide a contemporary view of advances across surgical and transcatheter techniques in heart valve disease
2. To bring multidisciplinary expertise together to improve collective understanding and support disease orientated care
3. To provide a wider perspective around state of the art management in complex care to achieve best health outcomes for patients

The programme will comprise:

- Short lectures
- Panel and audience discussion
- Trainees' best abstract/clinical case

Royal College of Physicians
11 St Andrews Pl, London NW1 4LE

Accepting abstracts and clinical cases submissions:

We welcome submissions from trainees in surgical, transcatheter and imaging fields.

Abstracts:

Please submit in electronic poster PowerPoint format: relating to original research or local service improvement relating to heart valve disease care pathways and services

Clinical Cases:

Please submit in electronic poster PowerPoint format: case presentation, assessment, images, decision making and benefits vs risks assessment, clinical outcome

Please ensure patient identifiable information is redacted and where required, patient consent is obtained.

A best abstract/clinical case from each of the three subspecialty fields will be announced and the winners will receive free registration for a BHVS meeting in 2024

Please upload the file in the file upload field or email to admin@bhvs.org.uk

Deadline for submissions: **Sunday 17th September**
